*Allowable Subject Matter*

1. Claims 1-81 are allowable over the prior art of records.
2. The instant application is deemed to be directed to an unobvious improvement over the inventions patented in Pat. No. 6,549,712 and 6,594,329. The improvements comprise an input port to a switching core including a packet Tx unit that receives a grant in response to the request and reads the packet from the memory in response to the grant by reading the blocks of data, wherein the grant may be received by the packet Tx unit before the packet is completely stored in the memory (claims 1 and 15); reading the packet from the memory, in response to the grant, by reading the block of data, writing freeing blocks of data within the memory, wherein the grant may be received before the packet is completely stored in the memory (claims 49 and 73).

The remaining claims, not specifically mentioned, are allowed for the same rationale from the parent claim by dependency.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
